Document 1: JP 2002-69590 A (NKK Corp.), 08 March 2002  
 Document 2: JP 2002-89724 A (Kitz Corp.), 27 March 2002  
 Document 3: JP 2000-257781 A (Kubota Corp.), 19

The invention that is set forth in claim 1 lacks novelty in the light of document 1.

The parts for a fluid system that are set forth in claim 1 are disclosed in document 1 (paragraphs [0001] and [0046], fig. 1).

The invention that is set forth in claim 2 does not involve an inventive step in the light of documents 1 and 2 cited in the international search report.

Document 1 does not disclose a valve which comprises a body member, an actuator member, a diaphragm member and a bolt that joins the aforementioned members, wherein the bolt is a metal member that has a specific composition. However, documents 1 and 2 can be said to suggest the parts for a fluid system that are set forth in claim 2 in the light of the disclosures of document 2 (fig. 13) and the feature disclosed in document 1 (paragraph [0046]), wherein [the clad steel] "is used in the structural body and the flow pipes for a reaction container."

Consequently, it would be easy for a person skilled

in the art to conceive of employing the abovementioned configurations.

The invention that is set forth in claim 3 does not involve an inventive step in the light of documents 1 and 3 cited in the international search report.

Document 1 does not disclose a pipe joint which is assembled by tightening a cap nut upon the threaded part that is provided to the outer periphery of the tubular joint member, wherein the cap nut is a metal member that has a specific composition. However, documents 1 and 3 can be said to suggest the parts for a fluid system that are set forth in claim 3 in the light of the disclosures of document 3 (fig. 1-6) and the feature disclosed in document 1 (paragraph [0046]), wherein [the clad steel] "is used in the structural body and the flow pipes for a reaction container."

Consequently, it would be easy for a person skilled in the art to conceive of employing the abovementioned configurations.
